

## No to be missed on this circuit

Langres, one of the 50 most beautiful cities in France (1)

With its high ramparts, imposing towers and many bell towers, Langres looks like a proud fortress camped at the gates of Champagne and Burgundy. Follow the maze of alleys and, at the turn of covered passages, let you tell the history of the city. It is Gallo-Roman with its ancient monuments, its mosaic of Bacchus and its very telling sculptures. It is medieval by its plot and by the radiance of its Cathedral of Clunisian inspiration. The Renaissance, meanwhile, unfolded in elegant mansions, introducing wealthy families to increasing comfort, in a setting inspired by the ancient treatises that classical civil architecture developed with great refinement.

The 4 lakes of the Pays de Langres (2 – Lake Charmes)

The mill of Baissey (3)

The watermill of Baissey dates back to the 15th century. During the tour, the trough wheel, grinding wheels and other gears will be set in motion to share with you the know-how of the millers of yesteryear. The mill, with its bief, has been listed on the Supplementary Inventory of Historical Monuments since March 20, 1996.
